## NH LSW/LSWA LSW and LSW-A Information ([click here](#) to download the info sheet)

July 2024 This [video](#) can answer many of your questions about LSW and LSW-A

- Why tiered licensure?

Billing requirements from insurance providers for licensure to provide/receive care	Professional development & career ladder
---	--

- LSW covers primarily case management and counseling:** Psychotherapy, top signature on treatment plans, differential diagnosis are NOT in the scope of practice for LSW's

- LSW (Licensed Social Worker)**

Attend and graduate from an accredited BSW program	2 years/100 hours of supervision
UNH and Plymouth State (St. Anselm College working towards this also)	ASWB BSW Exam required
Supervision agreement on file and approved by Board of Mental Health Practice	You can sit for the exam once you've been supervised for 18 months
Supervision Agreement in on OPLC website under "Education"	You can find the request to sit for the exam on the OPLC website under "Education"
Can be someone outside the organization (off-site supervisor)	Application for the full license at the end of the two years
You will receive your LSW-C (Licensed Social Worker - Conditional) once the supervision agreement is on file	

- LSWA (Licensed Social Work Associate)**

For people who have attended a program other than a BSW (AA, BA, BS) with courses in human services (psychology, addiction, etc.)	You will receive your LSWA-C (Licensed Social Work Associate - Conditional) once the supervision agreement is on file
Supervision agreement on file	ASWB BSW Exam (ASWB might be able to offer an associate's exam, stay tuned)
Supervision Agreement in on OPLC website under "Education"	You can sit for the exam once you've been supervised for 18 months
Can be someone outside the organization (off-site supervisor)	You can find the request to sit for the exam on the OPLC website under "Education"
If Bachelors (BA/BS degree): 2 years/100 supervision hours (from an LICSW, LCMHC, LMFT)	Bachelor's degree - 4000 hours of work, no fewer than 2 years
If Associates (AA) degree: 3 years/150 supervision hours (from an LICSW, LCMHC, LMFT)	Associate's degree - 6000 hours of work, no fewer than 3 years
Sometime between when your supervision agreement is on file and when you complete the required supervision hours, you will need to complete a 30-hour training (prior to full licensure)	
What if I've been practicing for 10 years and have already have supervision but no supervision agreement on file? Submit a request to the Board for a waiver	
If you are in between your MSW and LICSW with a supervision agreement on file, you will have your LICSW-C (Conditional)	
Conditional licenses can only be renewed once	

You can find the rules, application, and supervision agreement information on the NH Board of Mental Health Practice website. <https://www.oplc.nh.gov/board-mental-health-practice>

You can find the application [here](#) . On the top of the form where it says "Profession for which application is being filed" you will put "Conditional Social Work License". Some parts of this application will not apply to you and you can leave those parts blank.

# NH MCAP

## ACCESS LINE

**(603) 650-4741**

Provider-to-provider child psychiatry support

NH MCAP is your connection to provider-to-provider support from the Child Psychiatry team at Dartmouth Health Children's. Consults are available to primary care providers that care for children and adolescents in NH and are provided by phone, during regular business hours.

### HOW IT WORKS

**1**

**PCP needs support managing a pediatric behavioral health concern**

Support needs may be patient-specific or more general and include diagnosis, medication, and other treatment options.

**2**

**PCP or support staff call the Access Line at (603) 650-4741 to schedule a provider to provide phone consultation**

Be prepared to provide patient demographic data, a direct line to the PCP (back office or cell), and scheduling availability.

**3**

**Child & Adolescent Psychiatrist returns call at scheduled time to complete consult**

Most consults are scheduled within 1-3 business days and last about 15 minutes. PCPs can bill for time spent preparing and completing the consult.

**4**

**Consult recommendations are e-faxed to PCP**

A summary of the consult is sent to include in the patient chart.

**Institute for Health  
Policy and Practice**

**Dartmouth  
Health Children's**

This program is supported by the Health Resources and Services Administration (HRSA) of the U.S. Department of Health and Human Services (HHS) as part of an award totaling \$850,000 with 20% financed by nongovernmental sources. ## Frequently Asked Questions

### **Q. What kind of questions can providers call NH MCAP Access Line about?**

- A. The Dartmouth Health Children's Child and Adolescent Psychiatrist that supports the Access Line can answer mental health questions about assessment, diagnosis, and treatment planning including medication management or other treatments. Examples include questions about specific medication dosing or side effects and help with differential diagnoses or appropriate levels of care.

### **Q. What's the best way to frame my question?**

- A. Prior to speaking with the Dartmouth Health Children's Child and Adolescent Psychiatrist we will collect some basic intake data. During the consultation, it is helpful to understand what you are looking for help with and what you have tried so far.

### **Q. What is the average wait time to speak with a Child and Adolescent Psychiatrist?**

- A. Most consults are available within 2 days of request, depending on the overall volume of requests.

### **Q. How long will a call take?**

- A. The average consultation takes about 15 minutes, but you will get as much consultation as you need.

### **Q. What if I need a response right away?**

- A. The NH MCAP Access Line is not a crisis service, but NH does have resources to help! NH Rapid Response Access Point (833-710-6477) is a 24-hour service that can help you and your patient determine next steps which may include phone support, dispatch of a Rapid Response Team, or referral to an Emergency Department. More information can be found here:

[Acute Crisis Care | Children's Behavioral Health Resource Center \(nh.gov\)](#)

### **Q. How do I bill for this?**

- A. Interprofessional telephone/internet Electronic Health Record Consultation code 99452 may be reported by the treating/requesting physician, NP, or PA for 16-30 minutes in a service day preparing for the referral and/or communicating with the consultant.

### **Q. How does NH MCAP manage patient data?**

- A. Patient data and recommendations made during the consultation are recorded in Dartmouth Health's secure, HIPAA protected electronic health record and e-faxed to the requesting provider following the consult. All data used by NH MCAP for program evaluation is de-identified.

This program is supported by the Health Resources and Services Administration (HRSA) of the U.S. Department of Health and Human Services (HHS) as part of an award totaling \$850,000 with 20% financed by nongovernmental sources. WHAT IS CARROLL COUNTY'S

# 2021 YRBS

TELLING US?

CARROLL COUNTY COALITION  
FOR PUBLIC HEALTH

Most Carroll County youth  
DO NOT use alcohol or tobacco

In the past 30 days...

**85%**

of students **did not**  
binge drink

**85%**

of students **did not**  
use marijuana

**72%**

of students have **never used**  
an electronic vapor product

Most Carroll County youth DO NOT take illicit drugs

**97%**

of students have **never** used ecstasy

**90%**

of students have **never** taken prescription  
pain medication without a doctor's prescription

## What increases students' chances of substance use?

Students who reported...

### Ease of Access

...higher perceived ease of  
obtaining marijuana had **up to  
13 times greater likelihood**  
of more frequent marijuana  
use in the past 30 days.

...higher perceived ease of  
obtaining prescription drugs  
without a prescription had **up to  
40.35 times greater likelihood**  
of ever having used ecstasy.

### Violent Relationships

...being forced by a dating partner to  
engage in unwanted sexual activities  
one or more times in the past 12  
months are **22.2 times more likely**  
to have vaped in the past 30 days.

...more frequent days of poor  
mental health are associated  
with **up to 7.2 times higher  
likelihood** of using prescription  
pain medicine without a  
prescription or contrary to a  
doctor's instructions.

...missing more days of school  
due to feeling unsafe are **up to  
31 times more likely**  
to have ever used ecstasy.

## How do schools and communities use YRBS data?

- + School guidance counselors and principals use YRBS data during back-to-school nights.
- + School districts use YRBS data to develop appropriate educational health initiatives and establish curriculum objectives.
- + Teachers use YRBS data to teach students data interpretation and critical thinking by analyzing trends, comparing years, and evaluating intervention effectiveness.
- + Health education teachers use YRBS data to discuss current health issues facing youth and to compare current levels of healthy and unhealthy behaviors.
- + Schools and communities can use YRBS data to develop and strengthen health promotion and disease prevention programs and access funding for grants.

## What is the Youth Risk Behavior Survey?

The Youth Risk Behavior Survey (YRBS) asks students about risky behaviors and those behaviors that keep them safe. YRBS data is used to enhance state and local grant applications, develop more effective youth prevention programs, and offer a consistent long-term tool for measuring progress in reducing youth health risk behaviors.

# NALOXBOX

Indoor  
Overdose Rescue Station

What were the  
circumstances surrounding  
overdose deaths in 2022,  
New Hampshire?

## Opportunity for Change

Potential opportunities for intervention include linkage to care or life-saving actions at the time of the overdose

- 73.4% of drug overdose deaths had at least one potential opportunity for intervention
- 60.6% potential bystander present

\*<https://www.cdc.gov/drugoverdose/fatal/dashboard/index.html>

## Mission

To improve the capacity of bystander rescuers to save the lives of victims of opioid overdose with overdose response tools, including naloxone.

## Benefits

photo credit: nalobox.org

- Increase access to publicly available overdose response tools
- Provide technical assistance for naloxone storage
- Improve the capacity of bystander rescuers
- Reduce stigma associated with substance use disorders
- Reduce morbidity and mortality from opioid overdose

## COMMUNITY-BASED SOLUTION TO A NATIONWIDE EPIDEMIC

*"Opioid overdose can quickly lead to death if no intervention is made. If we begin to treat opioid overdose like any other bystander enabled medical response, we will begin to reduce the stigma often associated with opioid overdose."*

NaloxBox units are installed in many public-facing spaces including city and state offices, libraries, universities, public housing authorities, recovery centers, and more.
